STANDARD FILTERS AND CUSTOMIZED SOLUTIONS

PACKAGE DESIGN AND FABRICATION

Stryvo Group design and manufacture process packages from P&ID to finished product, including 3D design and layout, fabrication drawings and mechanical calculations/reports.

High level of documentation in accordance to customer requirements, and with excellent references to many projects.

Procurement, construction and testing are parts of our delivery.

We also offer custom built units based on customers design and specification.

PRESSURE VESSELS

We design and manufacture custom built pressure vessels.

- Materials include carbon steel, stainless steel 304L/316L, duplex, super duplex, Inconel 625 (also cladding) and other materials upon request.
- Pressure vessels in accordance to PED, EN13445, Norsok, Statoil TR1053 and customer specifications. In-house facilities for pressure vessel calculation (Visual Vessel design and FEA) and 3D design (SolidWorks) in combination with fabrication, NDE and pressure testing.

- More than 30 years experience
- Professional staff of engineers
- Optimal site locations and organization
- CNC machines for advanced tasks
- Modern welding equipment
- Focus on logistics and cost effective activities
